1.5 Automated tests

The application being tested is in production and some of the tests cannot be performed.

Functionality	Total	Pass	Failed	Blocked	Not Run	Defects
UI	10	10	0	0	0	

Conclusions

Smoke Test Cases, for the main functionalities in a percent of 90% were executed, 43 passed, 1 failed, 2 not run. The failed test case is related to Newsletter functionality.

In addition to Smoke and Positive Testing, testing types such as: Functional Testing, Exploratory, Compatibility and UI were covered.

Exploratory testing was performed for important functionalities, a bug with low priority was identified, related to the Newsletter functionality.

Compatibility testing was also performed, for different browsers and devices: Windows 10 Pro, Mozilla Firefox, Google Chrome, Microsoft Edge and Android 9.

Attempts were made to perform API tests, Load tests and Stress tests, but could not be run because the application is in production.
